5 Reasons to Upgrade Nowadays, many professionals use Adobe Photoshop to create images for print and the Web. Whether you are a part-time graphic designer or full-time digital artist, you need a tool to create great images. It may be hard to justify a Photoshop full-time license when you could go cheap or go free, but there are some reasons to upgrade to Photoshop. Download Photoshop on iPad and Mac For older Macs, now is the time to invest in a Mac, rather than a PC. The reason is that many Apple devices are available at cheap prices. Mac is more portable and versatile than PC. It is a single tool that can handle everything. However, Apple introduced the latest version of Photoshop CC on Mac and the tablet since January. They haven't released details yet, but it is clear that Apple is selling this version more than Photoshop CC. However, the question is how many professionals upgrade and use Photoshop on Mac at home. Using Photoshop on iPad You can bring Photoshop to the touch with the app. You can use the iPad to edit images and make adjustments without worrying about connecting to a PC. This is a great tool for new photographers or those who want to edit images on the go. Exclusive Features You can make impressive images in a few clicks with Photoshop on iPad, and you can do more with the buttons and features that are unique to Photoshop. For example, you can create your own brushes to add a vintage effect to the image. When you work on an iPad or Mac tablet, you can save your work in portrait or landscape format. This means that you can edit an image at the correct size. At the same time, you can preview your image on the iPad screen. How to Use Photoshop on iPad Download Photoshop on iPad You need the Photoshop touch app to use Photoshop on iPad. The app comes in two versions. You can download it in the App Store or install it on your iPad. Why are people upgrading? It is relatively expensive to purchase Photoshop, which is one of the reasons why professionals don't use Photoshop on the iPad and Mac. The Adobe Creative Cloud subscription cost about \$7.50 per month. For an unlimited download, a \$50 annual subscription is enough for Photoshop CC on Mac or iPad. Of course, Photoshop is not the only tool to use. If you don't use Photoshop 388ed7b0c7

Q: How do you get a Canvas under a TextView? I want to have a view, like a header for a list, that holds all the elements of my list, and I want it to be in the form of a text, the header, and the items of the list, below it, sorta like this: +-----+ || Header || |-----+ || || || || +-----+ I want the header to be on top of the items, and be able to scroll them all at once. The problem is, as you can see, I want the textview to "underneath", and my background to be on top of it. How do I do this? A: Add a RelativeLayout to your XML. Place the TextView in this layout. Use this code in your Activity: RelativeLayout header = (RelativeLayout)findViewById(R.id.RelativeLayout1); TextView headerTitle = (TextView)findViewById(R.id.my\_header\_text); RelativeLayout.LayoutParams parms = (LayoutParams)headerTitle.getLayoutParams(); parms.addRule(RelativeLayout.CENTER\_IN\_PARENT, RelativeLayout.TRUE); header.addView(headerTitle, parms); -built house of the victim's father, a resident of West Virginia.
