You can now hack your way towards that goal! War Thunder Hacks are the core of almost all cheaters. Not only do you get the benefits of a cheat, but you also get to directly hack critical parts of the game. Hacks are by their very nature what makes cheating possible. War Thunder Hacks are really just cheats that have been hacked. But what is an aimbot anyway? The aimbot and ESP (Empowering Sight Predictor) hack is the most important part of a hack. Aimbots allow you to aim very precisely at enemies. The ESP hack can tell you how you can aim at an enemy and what classes of bullets will do what. And thus, aiming very precisely at enemies would be a lot easier. The combat of War Thunder is a bit more complex than that. You have to manually aim at a target, and once you've made a successful hit, the game evaluates the effect of your damage. A critical hit from a lucky shot can be worth 50 points in a class-specific damage roll. A critical hit from an aimed shot can be worth 200 points. Criticals and criticals are evaluated before damage is rolled. This means that even if you miss an enemy, you might still roll the damage. The mechanic does complicate the use of hacks, but the good news is that, like all other games with hacks, the War Thunder hack will make the whole thing go way faster. See that? You can now hack your way towards that goal! War Thunder Hacks are the core of almost all f678ea9f9e
